

# Who likes living in a dirty, smelly world?

I'm sure most of us don't. But everywhere we look it seems so messy. Let's stop the blame game and start doing something to solve the problem.

## Do Something!

It all starts at home. Instead of one bin for your waste have at least two. Doing this can reduce waste going to your dumpsite by **90%**

### How to start at home:

If you already have two bins, then great! If not, line your existing bin with newspaper (not plastic) and use it for **wet waste**. Use a big plastic bag or a cardboard box for **dry waste**.

**Dry Waste.** (Consists of recyclables such as plastics, paper, metal, glass and so on) Keep them as clean as you can so it won't smell

**Wet Waste** (consists of kitchen waste, food scraps, floor sweepings, and other items that can decompose) Absolutely no plastics. Don't even use a plastic bag within the bin.

Make sure that **everybody** at home is aware about this change!

## Recycling Dry Waste

Recycling is easier than you thought. Collect your recyclables. The more you can collect the better. There's plenty of ways to do this!

- **Street Recyclers** will take your **Newspaper, Cardboard, Plastic Bottles, Metals, Glass & Hard Plastics** and pay you back a refund.
- **All Plastics, including Bags** are now picked up from every **Village Panchayat** in Goa by approved contractor. Ask your local panchayat for the collection date.
- Collect 100 empty **Goa Dairy milk packets** (clean & dry) and get a free packet of milk at any **Goa Dairy Milk Booth**.
- **TetraPak Cartons** (clean and folded) are being collected at certain **schools**. Collect and contact 9890936828 (Clinton) for details.
- Get your own **Battery** Collection Bottle from **GOACAN**. Contact 9822180182 (Roland)
- **E-Waste** is now being Recycled in Goa by **Attero**. Contact 9823118321 (Ashley)

## DRY WASTE

## WET WASTE
